

## PRODUCT BULLETIN

### JOHNSEN'S BRAKE FLUIDS

#### PRODUCT DESCRIPTION

Johnsen's Synthetic DOT 3 and Synthetic DOT 4 brake fluids meet or exceed FMVSS 116 and SAE J1703/J1704 specifications. The formulas for Johnsen's DOT 3 and DOT 4 brake fluids have not changed. The brake fluid in the bottles with the new labeling is exactly the same brake fluid as supplied previously.

#### APPLICATION

**All OEM DOT 3 and DOT 4 brake fluids are synthetic.** Therefore, Johnsen's brake fluids are highly recommended for aftermarket applications (both full fill and top off) because of their complete compatibility with OEM systems and fluids. Johnsen's brake fluids are also compatible with other brands of brake fluid.

	Boiling Point (ERBP)
DOT 3	
US Government Specification	401 F
Johnsen's Test Results (typical)	475 F
DOT 4	
US Government Specification	446 F
Johnsen's Test Results (typical)	500 F
